- Examine the IMO Guidelines on POR and the EU Operational Guidelines on POR

### Content

DNV GL Maritime Academy's one-day course on the latest updates on the **salvage and wreck removal** market and correct use of salvage and wreck contracts.

Emergency procedures are of an unpredictable nature. The new environmental requirements and the direct involvement of the state authorities in an incident, requires companies to be well prepared to respond in such events.

During this one day course the participants will be guided by sharing with the speakers their expertise and insights on a variety of topics related to the contractual and operational requirements of a general average and salvage incidents.

The aftermath of the Costa Concordia and the Rena have highlighted the emerging issues on the wreck removal operations . Time to analyse!

Places of Refuge. The new International and European legal framework, will be examined.
